

# QUEENSWAY

DENTAL CLINIC

Creating beautiful  
smiles - naturally

Your smile  
says so  
much

We all know that real beauty comes from within.

However, in a society where first impressions are important, having a beautiful, bright, healthy smile can be beneficial at both work and play.

At Queensway Dental Clinic our team of highly qualified and experienced dentists can enhance your smile through a number of different treatments and will always ensure your mouth is healthy before undertaking any cosmetic treatment.

We believe that communication is the key to producing the best cosmetic dentistry results and we will listen to what you want to achieve with your smile. Our dentists can then recommend the most suitable options to suit your needs and budget.

By choosing Queensway Dental Clinic to enhance your smile, you will benefit from a choice of flexible appointments without waiting lists.

A list of cosmetic services that we offer is featured opposite.

### Ceramic Veneers

The ultimate treatment for a smile makeover. Using the latest techniques in smile design and the highest quality, handcrafted laboratory porcelain veneers, we can create the smile that you have always wanted. While some patients opt for a brilliant white Hollywood look, others want a subtle change. Whatever you want to achieve, we can help.

### Crown and Bridges

We provide life-like, high quality metal free crowns that allow light to penetrate through, to give a natural look. We can replace artificial dull-looking crowns which may have black or grey areas showing around the gums to improve your smile.

Bridges will replace gaps, making the appearance of adjacent teeth more pleasing. Our highly-skilled laboratory technicians at Queensway will carefully construct crowns and bridges designed for you.

### Dental Implants

Dental Implants are a long-lasting solution for missing teeth. Implants will provide you with a durable result and are the next best thing to natural teeth.

Once implants have been placed they can be used to support a single tooth crown, a fixed bridge or even to secure your dentures firmly in place. This will give you the confidence to eat comfortably and laugh confidently, without giving it a second thought.

Our implant dentists are highly qualified, skilled and experienced in this exciting area of dentistry.

### Dental Bonding

Dental bonding systems can be used to; repair chipped or broken teeth, conceal stained teeth, close small gaps between teeth and treat sensitive teeth. This is with minimal or no removal of the tooth structure to provide fantastic results.

### White Fillings

Replacing an old metal filling with a natural-looking white filling will improve the natural appearance of the tooth to give you a confident smile.

### Gum Contouring

To make sure that not only your teeth, but your gums enhance your smile, you may benefit from gum contouring. This ranges from removing gum tissue to improve a 'gummy' smile, to the more complex removal of both bone and gum tissue.

### Tooth Whitening

We use the latest tooth whitening systems to provide excellent results. This very simple and popular procedure can improve the colour of your teeth by several shades.

### Adult Braces

Orthodontics will help you create a straight smile naturally. New technologies and great-looking, even invisible braces mean that more adults are now benefiting from beautiful smiles and straight teeth without anyone even knowing!

### Facial Aesthetics

We provide a range of non-surgical cosmetic procedures to rejuvenate the skin and reverse the signs of ageing. With injectable treatments we can subtly reduce the fine lines, creases and wrinkles to leave you with smoother, younger looking skin, without the need for surgery.

Queensway is registered with the Independent Healthcare Advisory Services (IHAS) to assure patient safety when providing non-surgical injectable cosmetic treatments.

## The difference is clear to see...

Alison received veneer and crown treatment to correct overcrowding and old, unsightly restorations.

Before treatment

After treatment

## And Alison has plenty to smile about

“ I felt very uncomfortable with my teeth and smile for many years, and lacked confidence as a result. I decided to seek advice from Uzma Olbrich, at Queensway Dental Clinic. In all it took approximately 3 months from start for my treatment, and it is the best thing I have done, and I am very confident about my smile now. I was treated professionally throughout, and I am very happy with Uzma who completed all of my treatment so well.”
