## Facial anti-ageing treatments

Feel  
confident  
in your  
appearance

For many people, looking young is an important factor in boosting confidence and feeling good. However, age is an unstoppable process and as we get older, our skin loses its natural elasticity and wrinkles develop.

With age, the hyaluronic acid content of our skin decreases. Oil-producing glands become less active and skin becomes dryer. The skin also loses fat so it looks less plump and smooth and its youthful colour and glow fades. But wrinkles and lines are not only caused by the ageing process, everyday exposure to the sun, smoking and stress is also a contributing factor.

There are two major types of lines that develop causing the face to age:

- Dynamic lines – due to muscle activity
- Static lines – due to volume loss

Both can be treated by anti-ageing cosmetic treatments to produce a subtle, natural, youthful look.

Queensway Dental Clinic is registered with the Independent Healthcare Advisory Services (IHAS). This means that we have met the rigorous standards to provide non-surgical injectable cosmetic treatments.

## Available treatment

### Botulinum toxin type A

**BOTOX®** relaxes the selected muscles that pull on the skin, causing lines and wrinkles. As the muscles relax, the lines will soften or even disappear completely.

It takes two weeks for BOTOX® to be fully effective, but you will notice the first changes after 4 to 5 days.

The effects of BOTOX® last 3 to 6 months depending on the individual, but repeat treatments have been shown to last longer.

### Dermal fillers

This product is designed to plump up static wrinkles and lines in your skin, softening them and giving a more youthful look.

The 2 products that we use at Queensway are made from hyaluronic acid, a substance naturally produced in the skin that is essential for keeping it looking plump, smooth and youthful.

**JUVÉDERM®** is a filler made from Allergan and is a smooth consistency gel which is injected to restore volume, fill lines, wrinkles and folds and redefines lips. Unlike other fillers, JUVÉDERM® is not granular which means that it is able to flow easily into the skin, giving a smooth, natural appearance.

**BELOTERO®** is a dermal filler made by Merz and is especially good for fine lines. The effect is instant, natural and subtle.

Both products are not permanent but the benefit can last anything up to a year, depending on skin quality, quantity of product placed and general health and lifestyle.

To find out more or to arrange a free consultation to find the best solution for you, please call Queensway Dental Clinic in Darlington on **01325 381928** or email [dental@queensway.co.uk](mailto:dental@queensway.co.uk)

Appointments can also be made at Queensway Dental Clinic in Billingham upon request.

## Dr Rebecca Hierons

BDS (Lpool), FDSRCS (Edin)

Rebecca qualified from Liverpool in 1993 and has pursued a career in Oral Surgery for 16 years. She obtained her postgraduate Fellowship in Dental Surgery FDS RCS from Edinburgh in 1996, then spent 13 years working in Newcastle General Hospital formerly as a Staff Grade and later on as an Associate Specialist in Oral and Maxillofacial Surgery. During this time she undertook minor oral surgery (wisdom teeth etc) under local anaesthetic, sedation and general anaesthetic as well as gaining extensive experience in the field of facial trauma. She has additionally undertaken oral implantology and bone grafting both in dental practice and in hospital. She was admitted on to the Specialist list in Surgical Dentistry in 2000 and the Specialist List in Oral Surgery in 2007.

Rebecca started to work for Queensway part time in 2003 and left the hospital in March 2010 to take up a full time post to become lead clinician for the Durham and Darlington Oral Surgery service.

She is currently studying towards the postgraduate diploma in conscious dental sedation at Newcastle University.

Rebecca also carries out non-surgical anti-ageing facial treatments in Queensway. These specialist techniques utilise BOTOX® and dermal fillers to treat facial lines and wrinkles. Her background in facial trauma surgery makes her eminently suited to carrying out these specialised treatments.
