

QUEENSWAY

IMPLANT NURSES COURSE

In association with

This certified one day implant course is aimed at dental assistants wishing to obtain an understanding of all aspects of implant dentistry and how best to progress their career to support their dentist as they undertake high-end dentistry. The course will consist of an interactive, group led discussion incorporating hands on training in setting up the surgery and placement of implants.

Course date: 17th November 2018

Price: £50

Registration: 8.30am and will finish at approximately 5.00pm (refreshments are included).

Course Objectives

- Discuss aspects of aesthetics in Implant Dentistry and what is required to reaching patients expectations
- Examine instrumentation required for implant techniques and preparing a sterile environment
- Have a clear understanding of the nurses role on patient co-ordination and the need for accurate communication to patients including pre and post-operative care
- Discuss compromised medical histories
- Gain an insight into Nobel Clinician and CAD/CAM

The course will be facilitated by Geraldine Temprell, tutor for Sheffield Univeristy Dental Hospital, who currently leads their dental nurse implant surgery and dental nurse implant courses. She has an extensive knowledge and experience in all Nobel Biocare Systems as well as bone grafting, soft tissue surgery and extra oral implants. She has worked at the Sheffield Hospital for 26 years, since qualifying as a specialist hospital dental nurse and examiner with the NEBDN.

Course Mentor

Geraldine
